

A close-up photograph of a green plush frog sitting on a blue computer motherboard. The frog is positioned in the upper center of the frame, with its head and front legs visible. The motherboard is densely packed with various electronic components, including capacitors, resistors, and integrated circuits. A white plastic component, possibly a fan or a connector, is visible to the left of the frog. The background is slightly blurred, showing more of the motherboard and some other components.

Work experience is required in programming. Specifically languages and an understanding of how the computer works.

There are about 185,700 jobs in this field.

Unfortunately, there is 10% decline in programming jobs since 2020.

There were 18,300 terminated programming jobs since 2020.

Programmers normally write and debug code. They may service computers and do media design as well.

Most programmers work in offices.

The best way to become a programmer is to obtain a bachelor's degree and to demonstrate knowledge of multiple languages.

The average lowest pay is \$51,440 and average highest pay is \$146,050.

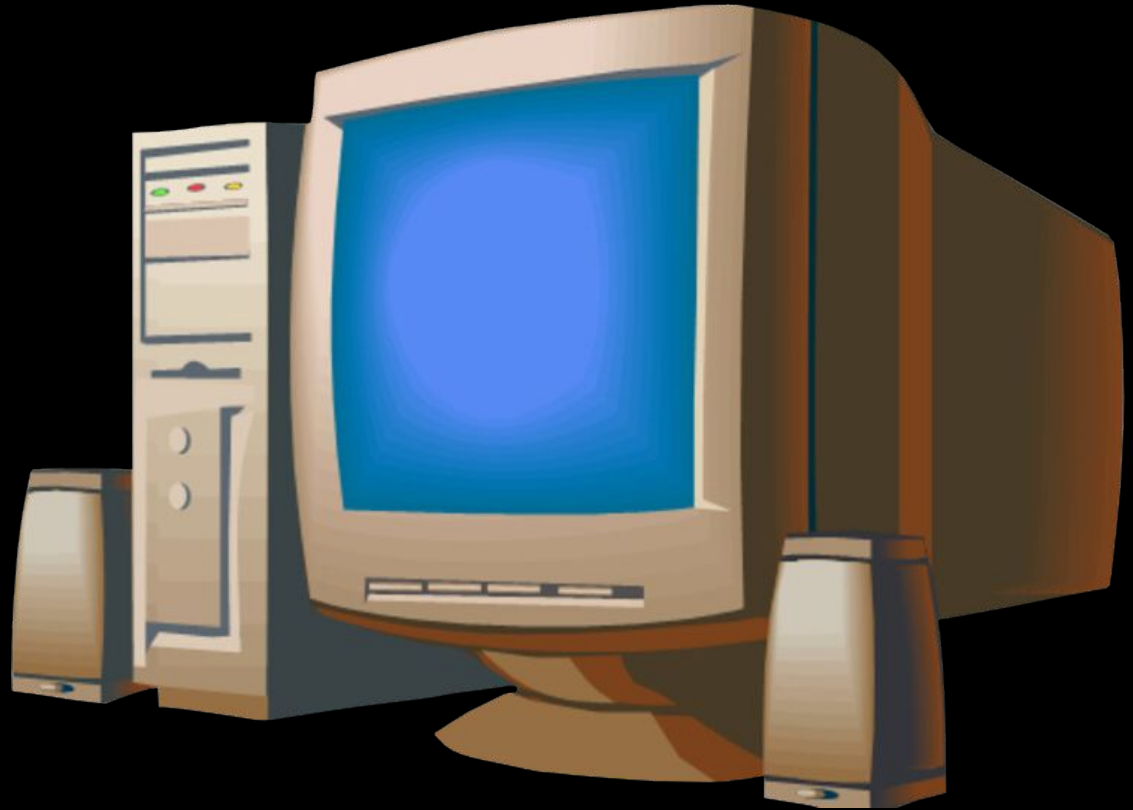

Despite employed programmers decreasing 10% last year, it is expected that there will be 9700 more openings each year.

Similar occupations

- Hardware
- Networking
- Tech Support
- Database
- Server Manager

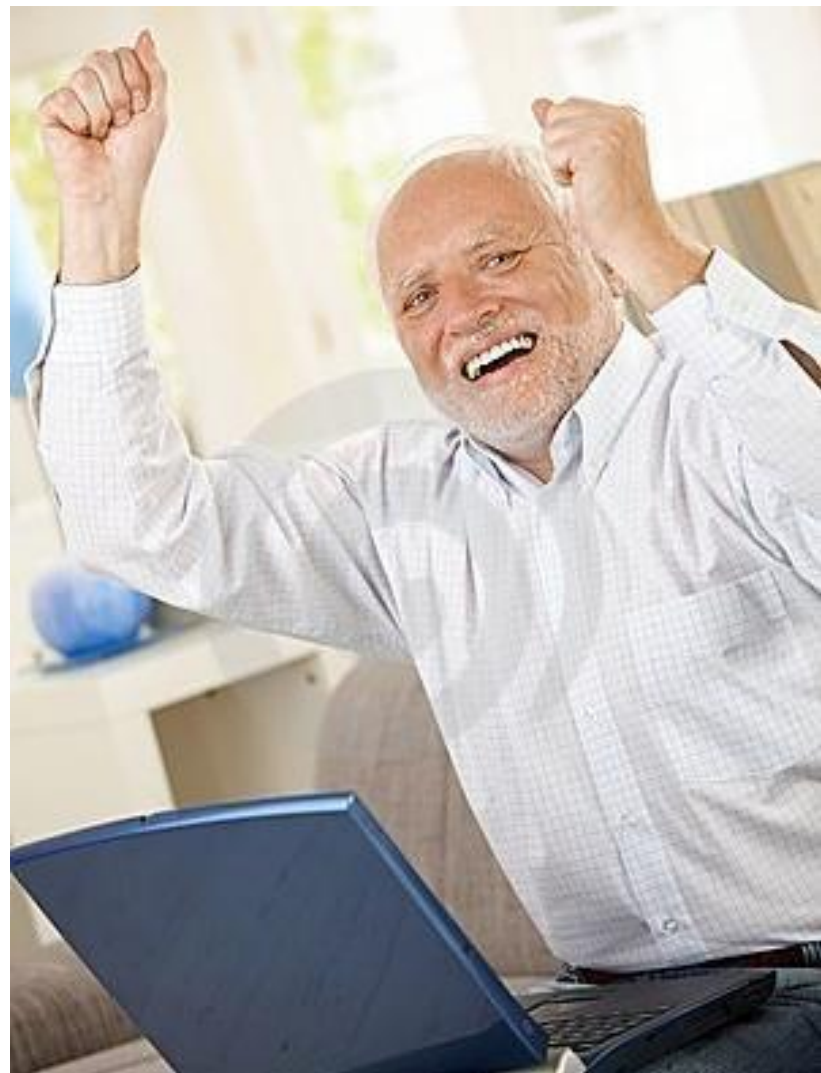

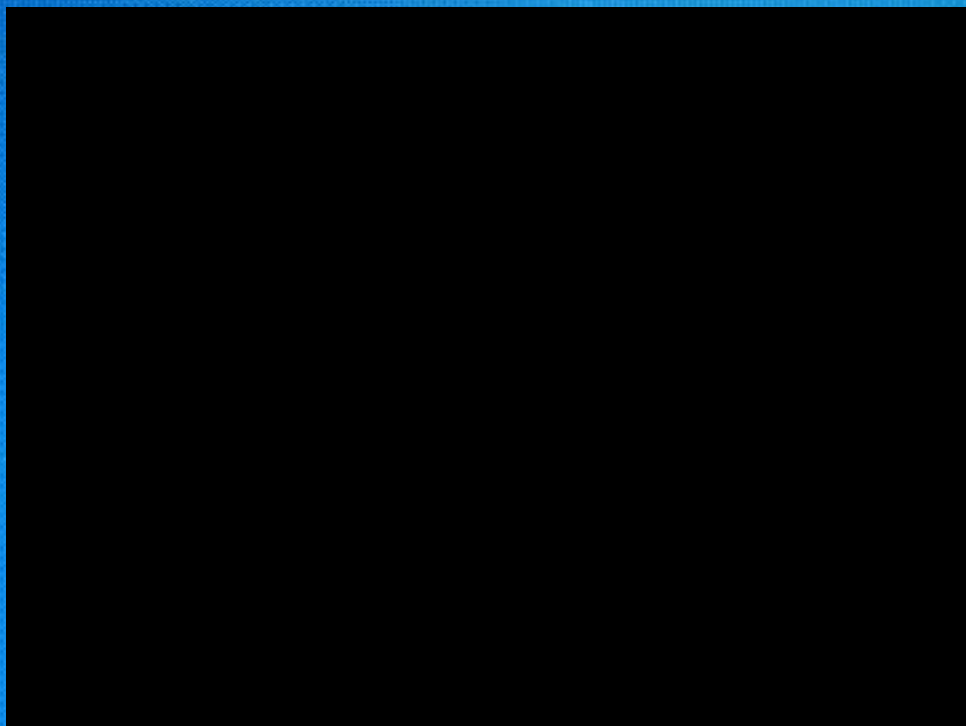

Hourly Pay - \$42.49

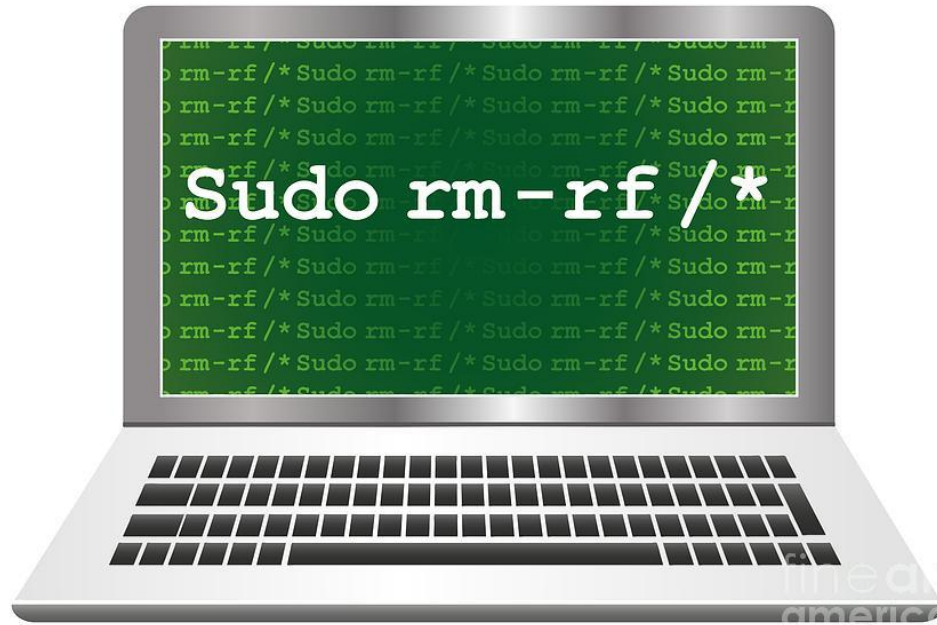

Yearly Pay - \$88,370

Growth Rate

The growth rate is about 9000 jobs per year.

Why I did I choose This

I enjoy programming and working with computers. I figured that since I am in IST and I spend most of my time working with computers, I would I a job doing that. Programming to me, is the most interesting as much can be achieved with it.
